Stuttgart, 14-16 March, Booth 7G78**

**Press Release 01/2017**

**JLT Mobile Computers to Showcase Vehicle-Mount Terminals with  
Virtually Unbreakable Screen Technology at LogiMAT 2017**

*JLT VERSO+ 10 and JLT1214P, two class-leading logistics computers in the industry's  
smallest form factor, now equipped with new PowerTouch™ displays for even greater  
durability and productivity*

**Växjö, Sweden, 18th January 2017** \* \* \* [JLT Mobile Computers](http://www.jltmobile.com), a leading developer and manufacturer of reliable computers for demanding environments, will be attending LogiMAT 2017 to show the latest rugged computers that increase productivity and minimize costly interruptions in the logistics and supply chain sector.

At the event (on **Booth 7G78** shared with German barcode specialist and partner **Panda Products**) JLT will be demonstrating the outstanding capabilities of its PowerTouch™ projective

capacitive touch (PCT) display technology, which is setting a new standard in terms of usability and reliability in the face of some of the industry's harshest applications.

JLT will be showcasing two of its most popular industrial computers equipped with the groundbreaking PowerTouch technology. The first is the compact VERSO+ 10 mobile computer, which is ideal for use within the heavy-duty and logistics segments due to its small form factor, flexible QuickLock feature and outstanding performance.

The second is the company's workhorse, the JLT1214P forklift computer which is renowned for its outstanding quality and reliability, and an ideal choice for logistics applications, ranging from warehousing and food distribution to freezer storage and cross-docking.

Both computers, equipped with PowerTouch technology, offer users an interaction experience similar to that of consumer devices, but thanks to the addition of a 0.07 in (1.8 mm) thick, chemically toughened glass cover, the screens are far more resilient, making scratches, scuffs or even breakage a thing of the past. Unlike resistive screens, that typically fail in areas where keys are regularly pressed, PCT screens aren't susceptible to wear and tear and are ideal for use with virtual keyboard technology, giving users even greater flexibility in their logistics operations. In addition to this robustness, PowerTouch screens share the capability of resistive touch screens in that they can be operated with gloves of different materials and thicknesses.

Combined with an Intel quad-core processor the PowerTouch screens also exhibit very fast response times, which means that after touching the screen the response appears to be instantaneous. This responsiveness is unparalleled in the industrial and logistics sectors. Finally, advanced control firmware, which filters out unwanted signals caused by water droplets on the screen, means that these screens can also be deployed in wet environments.

As a result of all these performance capabilities, PowerTouch screens can offer a service lifetime as long as the computer itself, minimizing disruptive down time and resulting in higher service levels and greater customer satisfaction.

### **About JLT Mobile Computers**

JLT Mobile Computers is a leading developer of rugged mobile computers for demanding environments. These PC-type computers are developed and manufactured in Sweden for professional use and are characterized by very high reliability in the face of moisture, dust, vibration, electromagnetic fields or extreme temperature – reliability that is required for use in areas such as transportation, warehousing / logistics, forestry, mining, automation, military and rescue vehicles. JLT operates globally with offices in Sweden and the US, complemented by a network of sales partners that provide complete solutions and local support. JLT has delivered over 90,000 PCs since its inception and the company's turnover in 2015 was SEK 81 million. The headquarters in Växjö, Sweden houses the development, service and administration departments. The company was founded in 1994 and since 2002 has been listed on the

NASDAQ OMX, First North, under the symbol JLT by Remium as Certified Advisor. For additional information, please visit [www.jltmobile.com](http://www.jltmobile.com).
