**Visit JLT Mobile Computers at Port & Terminal Technology,
11-12 April 2017, Norfolk, VA, US, Booth 19**

Press Release 04/2017

**JLT Mobile Computers to Highlight the Importance of Rugged IT Solutions
at Port & Terminal Technology Conference**

Advanced, rugged computers coupled to virtually unbreakable touch screens offer the most effective solution for highly demanding applications in the harsh environment of port operations

Chandler, Arizona, US, 21st March 2017 * * * [JLT Mobile Computers](http://www.jltmobile.com), a leading developer and manufacturer of reliable computers for demanding environments, will be exhibiting and presenting at this year's Port & Terminal Technology event in April in Norfolk, Virginia, US.

Illustrating why it has such a significant global presence in multiple, high-profile ports and terminals, JLT will be showcasing its Navis-ready validated rugged computers at booth 19. Designed from the ground up to deliver optimum operational capabilities in demanding applications, the JLT computers leverage the latest industrial components to offer leading performance. Thanks to their rugged construction and proven reliability they deliver long operational life, even in tough environmental conditions and from the hottest to the coldest temperatures.

Of particular interest to port and terminal operators are the virtually unbreakable touch screens available on several JLT computer models featuring the JLT PowerTouch™ display technology. These screens offer outstanding resistance to wear and tear, recognize touch input with gloves even in wet conditions, and reduce disruptive computer downtime. Combined with hardened glass, the deployment of capacitive touch screens offers a feature-rich user experience – typically seen in consumer device displays – but with unparalleled durability.

During the “Visions of the Future” session (session 6) at 11:50 on the 12th April, Chad Woodyatt, JLT Business Development Executive for Ports, will present “Capacitive touch screen technology gets fit for harsh port environments” and explain the technical details of the new implementation, as well as the compelling reasons for industrial customers to choose such hardened rugged screens.

JLT has a history of delivering the very best rugged computing technology, reflected in many of its important customer applications, including [Ports America](#), the largest terminal operator and stevedore in the US; the [Port of Gdansk](#), the Baltic’s only deep-water terminal; the [Basra Gateway Terminal](#), operated by ICTSI; [Exolgan](#), the main port operator in Argentina and member of the Global PSA; and terminal operator [ITS](#). In all instances, rugged JLT technology has been chosen for its robustness, ease of use and integration capabilities. As the use of less robust hardware can cause unforeseen IT downtime, bringing major issues and increased costs, maximum reliability and suitability are paramount – especially when dealing with time-critical logistics operations. It is for these reasons that JLT is at the top of the list for port and terminal IT applications.

About JLT Mobile Computers

JLT Mobile Computers is a leading developer of rugged mobile computers for demanding environments. These PC-type computers are developed and manufactured in Sweden for professional use and are characterized by very high reliability in the face of moisture, dust, vibration, electromagnetic fields or extreme temperature – reliability that is required for use in areas such as transportation, warehousing / logistics, forestry, mining, automation, military and rescue vehicles. JLT operates globally with offices in Sweden and the US, complemented by a network of sales partners that provide complete solutions and local support. JLT has delivered over 90,000 PCs since its inception and the company’s turnover in 2016 was SEK 126.9 million. The headquarters in Växjö, Sweden houses the development, service and administration departments. The company was founded in 1994 and since 2002 has been listed on the NASDAQ OMX, First North, under the symbol JLT by Remium as Certified Advisor.
