

JLT Technology Services™

JLT Technology Services™

For Enterprise Companies to Fully Leverage Their Technology Solutions – Realizing Maximum Return of Investment

Appropriate planning, installation and integration can make or break any IT investment. The key to a successful deployment begins with thorough evaluation of the project, followed by a detailed plan to avoid common pitfalls. JLT Technology Services include site surveys, installation and deployment services, hardware and wireless as a service (HaaS/WaaS) and project management and is offered to provide first-class service and support throughout the entire process – from custom developed solutions to delivery, installation and maintenance.

Installation and Deployment

Before starting a deployment, JLT can help to evaluate the project, do a site survey, test compatibility with existing devices and create a deployment plan to ensure that the right deliverables are assigned and executed, and that the right resources are available to meet the task at hand.

Hardware and Wireless as a Service

The hardware and wireless as a service (HaaS/WaaS) program from JLT is an all-inclusive, turn-key enterprise level solution. We survey, design, configure, deploy and optimize your

setup and proactively manage it throughout the contract term. JLT will monitor your networks' health 24/7 for maximized performance and in case of any outages remote diagnose and repair will be performed or if necessary a service technician is dispatched for on-site repair.

Benefits of JLT Technology Services

- Leverage extensive experience
- Control total cost
- Maximize up-time and return of investment
- Allow internal resources to remain focused on other business priorities
- Improve employee user acceptance
